## UNLOCK 60 FPS

# BEST GFX FOR PUBG

## Extra Features

Enhance sound, save settings

Pubg Gfx Tool Apk Uptodown Do you want to become a pro PUBG Mobile player but can't do it just because of game lag? Then you had come to the perfect website where I am going to share Pro GFX & Optimizer Apk, which will make your PUBG Mobile game buttery smooth. Now, unlocked 60fps and experience the smoothness in every match. Simply install this premium PGT+ Pro GFX & Optimizer(with advance setting) on your android, do some basic settings, and you are ready to play your game without any lag and frame drops. If you ever played PUBG Mobile, then you may know that it is a very heavy game that consumes lots of resources and memory. That means, if you have a device with low RAM and storage, it may not run properly. Also, you may face some graphics restrictions like you cannot enable HDR and Ultra mode in the game. Yes, I know, there are several hidden graphics settings in PUBG Mobile that improves performance, but to unlock them, you need any premium gfx tool. Most of the gfx tools are not working after the 1.4.0 update, also many of them caused accounts banned. So, today, I had brought PGT+-: Pro GFX & Optimizer(with advance settings), which is 100% working and safe to use. Keep reading, and I will guide you so that you can easily implement the best setting for any android device. What Is GFX Tool Gfx tool is the application that tweaks with your game's host file and unlocks the extreme frame rate. Frame rate or FPS is the abbreviation of Frames per Second. For example, if your device supports 30fps, that means your device can render 30 images in one second. For better and lag-free gameplay, you must need higher fps. But most of the low-end device doesn't support high fps settings, especially 2-3GB phones. That's why we are using the Pro GFX & Optimizer apk to unlock 60fps of our device. Along with 60fps, there are several other options like color format, potato graphics, and many others, which make it better than other gfx tools. If you are searching for any best pubg gfx tool that improves game graphics and texture without banning your account, then this is the perfect option to go with. What Is Pro GFX & Optimizer Apk Pro GFX & Optimizer Apk is a premium (Paid) version of an official pub gfx free tool where you can enjoy all premium features like Extreme 120 FPS, 1920\*1080 FHD resolution, Enhance the sound quality and many more for free. Access the deeper setting of PUBG Mobile and experience smooth gameplay in any situation. With Pro GFX & Optimizer, you can: Unlocked HD graphicsEnable 60fps on the low-end deviceFix choppy graphics and game lagEnable ShadowsAutomatically boost device memoryExport your perfect settingEnjoy potato graphics on latest pubg version As we know, by default, there are only three graphics options available in the game, i.e., Low, Medium, and High. Also Read: PUBG Mobile Mod Apk If you have a flagship android phone, then you can easily play PUBG without any lag even on a medium fps setting. But for low-end devices, you need to use either ultra or extreme frame rate. Also, you have to keep your game graphics and texture as low as possible. Features Of Pro GFX & Optimizer Mod Apk As I previously said, this is a paid version of the Pro GFX & Optimizer, which means it has some advanced settings and features that are not available in the free one. Below, I had highlighted some of its features, which I like the most. Unlock Extreme 60 FPS This is the most important feature of this Pro GFX & Optimizer apk. As we know, FPS plays an important role in performance. The higher the fps, the smoother your gameplay will be. But by default, there is only three option in graphics settings, i.e., 20fps, 25fps, and 30fps. If you have a low-end device and you are still playing PUBG on 30fps, then you may face choppy texture and device lag. After using this Gfx+ tool, you can easily unlock the Ultra and Extreme frame rate even on your low-end devices. In-built game setting Personally, I liked this feature very much. There are several Pub Gfx tools available on the play store, but we need to manually configure them to unlock extreme settings. As we know, every device performs differently, which means we need to configure the gfx tool according to device specifications. For some people, it is like rocket science to configure the gfx tool for the best performance. But using this In-built game setting, you can easily set up your graphics, texture, and render quality. How To Use In-built game setting: Open Pro GFX & Optimizer Pro ApkClick on 'Best settings for your device' optionSearch your device name in the search barClick on the 'Import' button. You can also send your installed setting with your friends if he has the same device as yours. Boost memory PUBG is a huge game that consumes lots of device space and memory. For better gameplay, you need to clean your device's memory frequently. It may take a lot of effort if you are doing it manually. That's why we are using Pro GFX & Optimizer pro apk. After activating the memory boost option, the gfx+ tool will automatically clean your device's memory and stop any background running applications. How To Activate Boost Memory Option: Open Pro GFX & OptimizerGo to Advanced Graphics optionEnable Boost Memory switch Keep in mind that you don't have to remove the PGT from the background; otherwise, this function will not work. Easy to use interface If you are using this Pro GFX & Optimizer apk tool for the very first time and worrying about its interface, then don't worry. Because it's easy to use interface that can understand by any non-techie person. All the options and settings are arranged in a specific manner so that you never messed up while choosing any specific options. Also, for better usability, I would recommend you choose the only first option, i.e., 'Best settings for your device,' which will automatically make changes to your game according to your device specification. Anti Ban This is another great feature of the Pro GFX & Optimizer premium version. As you know, PUBG directly bans any account which does any modification with their game files. Personally, I had tried many other gfx tools, but most of them do not work. Also, they don't have any anti-ban system. But in this Gfx+ tool, you get an anti-ban system that will protect your PUBG account even if you unlocked HD extreme fps. Some More Features Below are some more features you would love. Change fps according to your needDark modeEnable HDRDynamic Shadow RenderingSupports Various game variantSupports potato graphics How to download and install Pro GFX & Optimizer Pro Apk Installing an application from thinkers is a very straightforward task. Anyone who has a little bit of knowledge about android can easily download and install it on their device. Below, I had given a step-by-step tutorial so that you can easily download and install it on your android device. Step 1: First of all, click on the 'Go To Download Page' button. After that, you will redirect to the download page. Step 2: Now, get your application by clicking the 'Start Download' button. Within seconds, your download will start. Step 3: After downloading the file, open your file manager and click on the downloaded application. If you are installing an application from the file manager for the very first time, then it may ask you for some permission. This is optional steps and will only ask for the first time.If you didn't face any issue like this, simply ignore this step. Step 4: Now, click on the 'Settings' option and turn on the 'Allow from this sources' switch. Step 5: Press the back button and again try to install this app. This time, it will install without any error. Note: You must have to uninstall any previously installed version of Pro GFX & Optimizer free apk. The untouched version is without any patched. I will update the patched apk soon. People Also Ask (FAQs) I know there are hundreds of questions running in your mind. Below, I had tried to answer some of the questions that visitors asked me. If you think I hadn't picked up your question, or if you have any queries, then comment down. I would love to solve all of your questions. @ Will my pubg account ban if I used this gfx tool? No, your account will not ban. I am using this premium gfx tool on my own pubg account for the last two months, and I haven't faced any issue yet. What is the actual cost of this Pro GFX & Optimizer? The actual cost of this pubg gfx tool is around ₹65. But on thinkers, I am giving it for free. My Pro GFX & Optimizer apk is not working. What should I do? PUBG Mobile recently launched a new update that stops all types of potato graphics. Now, you must have to open your PUBG game through the tool. Wrapping It Up So that's it, guys. I hope you got the Pro GFX & Optimizer apk 2022 by which you can easily improve your gameplay. Now enjoy pubg mobile on your low-end device without facing any lag problem. If you like this PGT+-: Pro GFX & Optimizer, then don't forget to share it with your friends. Also, if you have any problems or queries regarding this tool, then comment down. I would love to solve all of your queries. @ Join @Thinkers on Telegram If you were to answer what is the most popular mobile games that're currently available on the Google Play Store, then the option would be no other than the famous PUBG Mobile. And while the PC version of the game has somewhat cooled down after the super hype back in 2018, PUBG Mobile is still one of the most famous mobile game for Android users to enjoy on their mobile devices, with hundred thousands of active players each day.Having said that, the game is still a relatively demanding mobile title that would require a significant amount of power from your hardware. On top of that, the unstable in-game experiences can also make it difficult for gamers to fully enjoy their FPS and Battle Royale with other fellow gamers. Hence, you'll need to find a way to reduce the graphical demands to enjoy the fullest game on your low-end phones.And fortunately, PGT+-: Pro GFX & Optimizer with its simple and accessible settings will allow you get into the game's configurations and enjoy awesome FPS experiences.Find out more about this must-have mobile app for PUBG Mobile gamers through our complete reviews.What does it do?While the game does come with its own graphic adjustments for Android gamers to enjoy their smooth and satisfying gameplay, due to the non-optimized graphics, many users would still find their games getting laggy and stuttering in certain situations, despite the fact that their hardware is fully capable of running the game.As a result, many users are making uses of the third-party apps to make certain changes to their in-game visuals. Here, you can enjoy intuitive and accessible visual settings for your gameplay which enable further configurations that you can have on your system. Thus, allowing you to smoothen the gameplay with constant FPS, and sometimes, drastically reduced graphics to the "potato-like" levels.Feel free to make uses of the available in PUB Pro Graphics Toolkit as you make simple and accessible changes to the system, or more advanced and significant adjustments, which will make the game a lot more playable, and also, interesting to look at. RequirementsWith the app being built for low-end devices, users can find it offering quite accessible experiences on your Android phones or tablets. Hence, it's totally possible for you to install the app on any of your Android devices, just make sure that they're running on Android 4 or above. And of course, you should also have the main game of PUBG Mobile installed on your devices first to test out the changes as they're applied.Awesome featuresHere are all the amazing features that the app has to offer:Quickly select the best setting for your devicesTo start with, for any of you who're looking for a quick experience with your PUBG gameplay, you can have fun all the available preset configurations in PGT+-: Pro GFX & Optimizer. Here, gamers are allowed to choose between more than 1000 built-in settings for any of your Android devices. With hundreds of available models, it won't be difficult to select the right settings for your devices. Thus, allowing you to enjoy smooth and satisfying gameplay with reduced graphics with just a few taps.Choose the different game variant on your devicesOn the other hand, for those of you who're having their unofficial PUBG Mobile versions installed on your mobile devices, PUB Gfx Tool also offers the variant settings for your certain installations. Here, you can choose the version of variant that you're using and have the system completely optimized for each of those. Hence, you'll also have the other features of the app properly supported.Make certain adjustments in the Basic SettingsFor those of you who're more interested in manual settings, the app also offers dozens of customizable options for new users to try out in their Basic Settings. Here, you're able to make changes to the Resolution and Graphic quality of your images. Feel free to select the best options judging on your hardware capability so you can enjoy smooth and satisfying experiences with the renewed graphics.In addition, to improve your in-game experiences, PGT+-: Pro GFX & Optimizer does offer the amazing FPS setting which would help smoothen the gameplay, and the unique graphic styles which let you choose between different visual modes. Feel free to have fun with your realistic, dramatic, cinematic, and many other visual styles in PUB Gfx+ Tool.And for further graphics configurations, you can also make changes to the Shadow effects, and the MSAA settings to customize your in-game experiences to the fullest.Make use of the advanced settings to enhance your experiencesAs you dive into the deeper options in PUB Gfx Tool, Android gamers can even make complete changes to the system and improve their gameplay to the fullest.Start by using the Memory Boost to prioritize your PUBG Mobile gameplay to ensure that it can have access to the most amount of system resources. Also, ensure your competitive Battle Royale gameplay with the Zero Lag Mode which will allow you to enjoy smooth gameplay with consistent FPS all the time.To take things to an even more extreme experience, PGT+-: Pro GFX & Optimizer even let users to turn their characters into Potato graphics with hilarious interactions. Or have fun with the Hardware-Accelerated Rendering to make full uses of your devices' processor.Feel free to save all your in-app settings and apply them whenever you want. Miscellaneous settings with interesting graphics customizationsFor those of you who're interested, PUB Gfx+ Tool does offer other miscellaneous settings, which you can make uses of and enjoy. Start by changing the color format in your system and unlock unique visual experiences. Change the Rendering Levels with many available options to beautiful or turn your characters into literal potatoes.Have fun playing with the detail mode to spot whatever unique experiences that the game has to offer. And also have fun with the lighting effects, to enable unique and interesting visual experiences.Have fun with the experimental settingsAnd last but not least, if you're still not satisfied with the exciting in-game visuals from PUB Gfx+ Tool, you can now have fun with many experimental settings that the app has to offer. Feel free to try out any of these unique settings to adjust your in-game audio, change the Shader effects, and so on. Make changes to the experimental settings whenever you want to experience unique experiences in a much more satisfying ways.Look for guides and instructions in the appFor those of you who're finding the app being somewhat difficult to use, besides those of the basic settings, you can find easy helps from the complete FAQ in PUB Gfx+ Tool. Learn how you can effectively make changes to the in-game settings of PUBG Mobile with the awesome changes that the app has to offer.On the other hand, you can now switch your language options with dozens of available localizations for your app. Enjoy simple and convenient uses, now that the app is available on your native languages.With all the settings properly in-place you can easily back them up and restore them any time you want. Thus, you're free to make any changes to the system without worrying about losing your old settings or gameplay.Enjoy the app with Dark modeTo make the in-app experiences more satisfying, Android users will also find themselves being able to turn on the Dark Mode, which would change the interfaces into a more approachable look. This makes the app extremely suitable for night uses.Pick up the app for free on our websiteSince PUB Gfx Tool is currently listed on the Google Play Store as a paid version, you'll need to pay to unlock all of its features. Hence, some of you would probably want to go for our unlocked version of the app, which is also free to use. Just download the PGT+-: Pro GFX & Optimizer MOD APK on our website, follow the provided instructions and you'll be good to go. Feel free to have fun with the fully customized visual experiences with all of the available settings.DrawbacksThe app isn't supported by PUBG MobileFor those of you who're interested, PUB Gfx Tool does offer intuitive and effective settings for making your PUBG Mobile gameplay more satisfying. However, since the app isn't an official product from PUBG Mobile, you'll find, most of the time, the new in-game updates will not work on the app, unless you let the devs have some time to release their updates. Hence, you won't be able to make uses of interesting features.Final verdictsWith simple and interesting features, PGT+-: Pro GFX & Optimizer will allow Android gamers to enjoy their fullest in-game experiences with PUBG Mobile. Feel free to make any changes to your gameplay, and always have fun with the completely free app on our website.
